DUS360CR

Multifunction Sensor

Low profile recessed 360° ceiling sensor

The Philips Dynalite DUS360CR is a recess mountable 360 degree multifunction sensor that combines motion detection (PIR), infrared remote control reception (IR) and ambient light level detection (PE) into one device in applications such as offices, lecture theaters and homes.

Low profile recessed 360° ceiling sensor

- **Motion detection feature** – Detects the presence or absence of motion and adjusts lights accordingly.
- **Segmented click-up bezel** – Surrounds the motion sensor element and enables a portion of the sensing field to be masked. This prevents nuisance detection from adjacent doorways or corridors.
- **Ambient light level regulation** – In applications where it is critical to maintain precise light levels, the PE function reads ambient levels and adjusts artificial light accordingly.
- **Infrared receive capability** – Manually adjust light levels using a hand-held remote control, via the inbuilt IR receive sensor of the DUS360CR.
- **Daylight harvesting mode** – Delivers automatic energy savings.
- **Corridor hold** – Links corridor areas with adjacent rooms so corridor remains lit while occupancy is detected in adjacent rooms.
- **Anti-stumble sensing option** – Helps users move about safely at night without having to find a light switch. (see page 4 for details)
- **Suitable for plenum use** – UL2043 certified for installation in air-handling plenum spaces.

Detection Area

Detection Area with DUS180WR Anti-Stumble Faceplate

Mounted as shown below with the optional DUS180WR faceplate, the DUS360CR provides ground-level bedside motion detection after dark. When a guest leaves the bed at night, selected lighting channels come on at minimum brightness so that they can move about safely without waking other sleepers.
