

Smart CFL-I downlight FBS111/112/113/115/116 – a reliable way to create outstanding lighting

Theta FBS110

Our Smart CFL-I downlight is a safe, reliable and flexible solution that comes in five sizes for different cut-outs. Its elegant design guarantees a perfect fit in any retail or hospitality environment. And because the downlight has been designed specifically for CFL-I lamps, installation and maintenance couldn't be any simpler.

Benefits

- Safe
- Durable
- Flexible

Features

- Specular diamond faceted reflector for a wide and efficient beam
- Special sandblasted louver for glare-free visual comfort
- New class I three-way connector and sleeving to prevent electrical shocks
- New self-adjusting mounting clips for easy installation
- Suitable for wide range of retrofit energy saving lamps - 3W to 23W CFLs (may vary for different type of luminaires)
- CCC-certified; truly safe and reliable
- Available in five sizes for different cut-outs; two models can be adjusted to accommodate more types of lamp
- Elegant design; integrates perfectly into shop and hotel environments

Theta FBS110
