Dynadimmer – different ways

Dynadimmer

Luminaire based, stand-alone controller for 1-10 V electronic driver. The design of the Dynadimmer is optimized for mounting in a luminaire or gear tray. Designed to be controlled through external dusk-dawn switches like light sensors or cabinet-controlled switching. A 5-step dimming schedule is created in easy-to-use software, dimming schedule is downloaded in Dynadimmer via a Programmer or USB PC cable. The Philips Dynadimmer is designed and released to interact with Philips 1-10 V gear and is compatible with dimmable drivers with a standard 1-10 V interface,

Benefits
· Maximize energy savings through 5-level dimming
· Stand-alone, no commissioning, no operational costs
· Reduced light nuisance
· Find the programming software here: www.lighting.philips.com/main/products/ lighting-controls/software.html

Features
· Easy-to-use software provides a forecast of energy savings
· Very small size – fits inside almost any luminaire
· Double isolated SELV version for LED luminaires
· Dynadimmer Programmer App for Android platform, that runs on your preferred handheld device and connects to the Dynadimmer via a mini-USB cable.

Application
· Roads, streetsResidential and area lighting, including parking lots, ports, train stations and industrial complexes
