

# Xenon Entertainment (Follow Spots) – sunlight, always

## Xenon Entertainment (Follow Spots)

The pure xenon gas filling of the Xenon Entertainment (Follow Spots) helps ensure pure, white light that matches the spectral distribution of the sun. Besides this, it generates these color properties consistently throughout its entire lifetime, ensuring sunlight-quality colors, always. In addition, its hot restrike ability maximizes availability, while the capability of operating at lower than rated wattages means that dimming strategies are possible.

### Benefits

- Constant color properties during lamp life
- Pure, white light matching the spectral distribution of the sun
- Hot re-ignition is possible ensuring constant light availability
- Capable of operating at lower than rated wattages

### Features

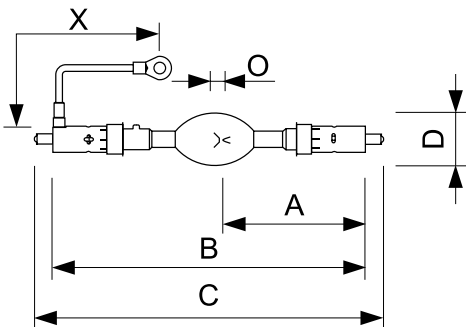

- Pure Xenon fill gas
- Approx. 6000K color temperature
- Hot restrike
- Dimmable
