

ComfortVision – asymmetric downlighting

ComfortVision SNF111

ComfortVision is a high-efficiency, asymmetric floodlight, distributing a low-glare beam evenly and accurately. It can accommodate metal-halide lamps for good color rendering or a high-pressure sodium lamp for economical performance. Available in medium- or narrow-beam versions, the floodlight accepts a single 1000 or two 400 or 600 W lamps. The twin-lamp version offers switching flexibility that permits tailoring to the user's needs while allowing energy savings. ComfortVision's rugged all-weather construction is designed for easy aiming, simple cleaning and speedy servicing. For optimal downlighting, the luminaire should be mounted horizontally at a height of 15-25 meters. It has an adjustment range of $\pm 12^\circ$ from the horizontal. A universal mounting bracket allows mounting to headframes, ceilings and walls.

Faydaları

- High-efficiency asymmetrical floodlight that distributes a low-glare beam evenly and accurately
- Maximum flexibility with a choice of medium- or narrow-beam versions and a single 1000 W or two switchable 400 or 600 W lamps
- Rugged, all-weather construction designed for easy aiming, simple cleaning and speedy servicing

Özellikler

- Dayanıklı, tüm hava koşullarına uygun yapı
- Tek bir 1000 W veya değiştirilebilir iki adet 400 veya 600 W ampul
- Orta genişlikte veya dar ışın
- Yatay konumdan $\pm 12^\circ$ ayarlanabilme mesafesi
- Evrensel montaj desteği

ComfortVision SNF111

Uygulama

- Industrial areas
- Roundabouts
- Car parks
- Sports lighting
