

# Original Replacement Modules for best quality and performance

## Projection TV lamp replacement modules Sony

Using original Philips manufactured replacement modules, all with patented high quality Philips UHP lamp inside, is the best lamp replacement solution for your TV set. Philips replacement modules protect customers from any counterfeit modules. Philips replacement modules ensure the quality of projection experience in terms of safety, light output, reliability and efficiency. The portfolio of TV replacement modules covers the majority of projection TV brands.

### Benefits

- Identical lamp as used in the original TV set for great viewing experience
- Low cost of ownership due to long lamp lifetime
- Easy to replace by end-users
- The original lamp offers perfect picture quality with deep and rich colors

### Features

- Seamless fit - identical lamp used as in the TV set
- Match - the lamp in the module matches the TV specifications
- Robust - the complete module meets the highest quality standards
- Technology - the replacement module and lamp are designed with the latest Philips technology

### Application

- Used to replace lamps of projection TV sets, mainly used in home or in public places in the US.
