eW Cove QLX Powercore – affordable, high-output linear cove light

eW Cove QLX Powercore

eW Cove QLX Powercore represents the next generation of high-quality linear LED cove lighting. This elegant, low-profile fixture delivers a high output of white or solid colour light at an affordable price. eW Cove QLX Powercore is designed to replace traditional white cove lighting sources for wall and ceiling glow effects, wall washing, and indirect lighting from a single cove. Multiple colour temperatures, solid colours, beam angles, and lengths afford an abundance of design options. Integrated Powercore technology ensures rapid, efficient and accurate control of power output to the fixture directly from line voltage, eliminating the need for external power supplies. Use of standard wiring dramatically simplifies installation and helps lower total system cost.

Benefits

- Excellent output of white or solid-colour light
- Multiple options for design flexibility
- Energy-efficient, easy to install, and long lifetime

eW Cove QLX Powercore

Features

- Light output of up to 300 lumens per fixture
- Available in four colour temperatures, ranging from a warm 2700 K to a cool 4000 K, and four solid colours (red, amber, green, and blue)
- End-to-end locking power connectors can make 180º turns; rotation in 10° increments through 180° for precise aiming and colour mixing
- Smooth dimming capability with standard ELV-type dimmers
- Integrated Powercore technology

Application

- Wall and ceiling glow effects
- Wall washing
- Indirect lighting
