

# ColorReach Powercore – next- generation LED floodlight for signature façades and structures

## ColorReach Powercore gen2

ColorReach Powercore is the first LED fixture powerful enough to brilliantly and dynamically illuminate large architectural façades. ColorReach Powercore combines all the benefits of LED-based lighting and control in an elegant fixture specifically designed for large-scale installations, such as commercial skyscrapers, casinos, large retail exteriors, bridges, piers, public monuments, and themed attractions. With extremely high lumen output and unprecedented light projection, this powerful fixture represents the next generation in exterior illumination. Build-to-order configurations with custom channels of white or color LEDs are also available to support special applications. Integrated Powercore technology ensures rapid, efficient and accurate control of power output to the fixture directly from line voltage, eliminating the need for external power supplies. Use of standard wiring dramatically simplifies installation and helps lower total system cost.

### Benefits

- Unparalleled light output
- Unique split design to support diffuser combinations
- Compatible with industry-leading controls

# ColorReach Powercore gen2

## Features

- Rich, saturated color light output of over 8,000 lumens and light projection over 150 meters
- Exchangeable spread lenses of 8°, 13°, 23°, 40°, 63°, and an asymmetric 5° x 17°
- Simple positioning and fixture rotation through full 360°
- Works with complete Philips line of controllers, as well as third-party DMX controllers
- Integrated Powercore technology and Philips Data Enabler Pro

## Application

- Large-scale signature facades and structures
