

iW Reach Powercore – intelligent white LED floodlight for signature facades and structures

iW Reach Powercore gen2

iW Reach Powercore is the first LED fixture powerful enough to brilliantly illuminate large architectural façades with washes of white light in color temperatures ranging from warm to cool. iW Reach Powercore combines all the benefits of LED lighting in an elegant fixture specifically designed for large-scale installations, such as commercial skyscrapers, casinos, large retail exteriors, bridges, piers, public monuments, and themed attractions. With extremely high lumen output and unprecedented light projection, this powerful fixture represents the next generation in exterior illumination. Integrated Powercore technology ensures rapid, efficient and accurate control of power output to the fixture directly from line voltage, eliminating the need for external power supplies. Use of standard wiring dramatically simplifies installation and helps lower total system cost.

Benefits

- Unparalleled light output
- Wide choice of color temperatures
- Unique split design to support diffuser combinations

iW Reach Powercore gen2

Features

- Light output of over 12,000 lumens and light projection over 240 meters
- White light ranging from cool (6500 K) to warm (2700 K)
- Spread lenses of 8°, 13°, 23°, 40°, 63° and asymmetric 5° x 17°
- Simple positioning and fixture rotation through full 360°
- Integrated Powercore technology and Philips Data Enabler Pro

Application

- Large-scale signature facades and structures
