

AeroScape - bridging modern design with leading technology

AeroScape LED Sconce Small

AeroScape wall and surface mount series features energy saving LEDs and a design that compliments modern architecture. ASW suits both building and perimeter zones as well as egress lighting zones. Three optical distributions are available to provide task and egress lighting around the perimeter of a building. ASW features LEDGINE, Philips global platform, which ensures the optical system is fully upgradable as technology advances. Full range dimming and control options are available for additional energy savings. An advanced passthrough convective thermal management system ensures optimum performance and long life.

Benefits

- Up to 50% energy savings over HID
- Optimal versatility and design flexibility
- Quick and easy installation and maintenance
- Over 100,000 hour life
- Suitable for a variety of applications

Features

- Superior optical performance
- Use of quality materials
- Best in class thermal management
- Full range of control options available
- IP66 rated optics

Application

- Walkways
- Security Lighting
