

Architectural and unobtrusive

Fusion II Recessed Lay-in Emergency Unit

The Fusion II provides all of the popular features of the original Fusion, but with a special design for drop in installation into 2X2 grid suspended ceiling systems.

Benefits

- Aesthetically appealing and designed for architectural excellence
- Low profile is less obtrusive than traditional, making it more aesthetically appealing

Features

- Backbox constructed of 14 gauge galvanized steel
- The aluminum faceplate allows direct ceiling tile replacement
- For suspended ceiling installation

Application

- Exit and Emergency
- Office
- Banks
- Hospitality
- Fashion
