

TriLyte Nordik - Cost effective with quality

TriLyte Nordik

The TriLyte Nordik is designed to achieve the same level output at -18°C than a regular fluorescent high bay at 25°C ambient temperature. With the TriLyte Nordik, experience the energy savings, high color rendering and very low lumen depreciation that was once reserved for standard ambient temperature.

Benefits

- Streamlined aesthetic design
- Superior strength

Features

- Designed for refrigerated environments
- Surface, stem or chain mounting options
- Smooth and installation-friendly corners

Application

- Office
- Banks
- Hospitality
- Manufacturing
- Arena and Sports
