Lighting

Freedom to customize

Tunable white

Philips tunable white lighting solutions provide more than illumination. Through a combination of light quality, color, and intensity, they help create environments that can be tailored to occupants needs and preferences. .~LT~br~GT~~LT~br~GT~~LT~a href="http://www.philips.com/tunablewhitetechnology"~GT~For more detailed information and video click here.~LT~/a~GT~

Benefits
• Dynamics: Automatically adjust color temperature and brightness depending on time of day or task
• Scene Set: Use factory installed presets to A combination of predetermined presets instantly sets the scene for room ambiance that supports the next scheduledtask or spontaneous activity.
• Personal Control: Get more flexibility and easily change LED intensities and correlated color temperature (CCT) from warm white (2700K) all the way to cool white (6500K).
•
