Transform your environment

Create your image

Transform your environment with Vaya Free Form. This slim, flexible, linear LED luminaire lights even the tightest of spaces. Straight or curved, it can change the energy of a retail store, accentuate a building's features, or brighten any façade. Designers, architects and building owners worldwide are already seeing the difference.

Vaya Free Form was designed with flexibility in mind. There really is no limit to what it can do. Indoor or outdoor, it achieves the same stunning effect—so let your imagination run wild. And as with all Vaya products, Vaya Free Form gives you quality, dependability, and value.

Stand out

How will people remember you? Lighting may be subtle, but it's a crucial way of establishing your brand identity and influencing how people feel about you. Vaya Free Form helps you make an impact. And you can keep it consistent across all your locations.

Set the mood

Lighting affects how people feel. A warm light is comforting and soothing. A cool light can energize and motivate. When we say it's flexible, we don't just mean the housing.

Time's up for tape light

Sure, tape light is cheap. But can be unreliable. In fact, the cost of regular maintenance often cancels out the initial low costs.

Vaya Free Form is changing the game. It's high quality, flexible and—most importantly – is far more dependable than tape light. You're investing in long-term reliability. Here are some more reasons why Vaya Free Form is perfect for your project.

LED protection

Vaya Free Form LEDs are housed in tough silicone, protecting the circuitry from damage and failure. The frosted silicone lens also ensures uniform illumination across the length of the luminaire. No more hazy light and broken wiring.

Easy mounting

Tape lights only hold in place when the surface is clean and smooth. Even then, the heat and humidity eventually take their toll. With Vaya Free Form, the sturdy mounting track and clips hold the luminaires in place regardless of the surface. Not an adhesive in sight.

Use what you need

Vaya Free Form lets you cut and connect segments however you wish. You won't have to worry about waste and if a replaced is needed, it can be done quickly and easily.

Save money over time

We believe you should never sacrifice on quality, but quality doesn't have to break the bank. Vaya Free Form is cost-effective to buy, install power, and maintain. It's a reliable luminaire that will help establish your brand's identity and let you break free from the constraints of tape light.

Transform your building

Aesthetics. Finances. Integration. They're the key aspects to consider when making the switch from incandescent bulbs and fluorescent tubes. Any change you make needs to fit seamlessly into your building, but Vaya Free Form makes the transition simple.

Vaya Free Form brings you a whole range of benefits:

Light where you need it

Illuminate any cove. Highlight any feature. Bend to any shape. Low-profile design means Vaya Free Form brings quality light to the tightest of spaces.

Consistent illumination

No breaks. No color shift. The best lighting goes unnoticed. Vaya Free Form emits stunning, uniform light in any application.

More for your money

Vaya Free Form luminaires are high-quality and reliable. You don't get the waste associated with traditional tape lights, and they require far less maintenance. The LEDs are better for the environment, too.

Easy installation

Mounting tracks and secure mounting clips keep your Vaya Free Form luminaires firmly in place. Plus, the durable silicone enclosures protect internal circuitry. You can be confident that your LEDs won't change position or be exposed to environmental damage.

Temperature choices

Create the ambiance you want with 3000 K or 4000 K luminaires. We'll help you choose the one that's just right.

Global Reach

The exceptional quality and cost-effectiveness of Vaya Free Form lighting is accessible wherever you are in the world. We'll help you maintain your brand identity between sites and across borders.

A Clear Vision of the Future

Vaya is driven by, and responsive to, the evolving needs of the marketplace, adding new capabilities and innovations to Vaya Free Form and the rest of our extensive portfolio of lighting solutions.

Constant innovation

With the marketplace constantly evolving, Vaya Free Form is staying ahead of the curve. We're always pushing the boundaries of what lighting can do.

A Wide Range of Choices

Vaya Free Form comes in two light color temperatures, each offers unique qualities that can be utilized in different ways.

Dimmable White

Dimmable white light in two color temperatures—3000 K or 4000 K.

Explore the Vaya Free Form family

Choosing an LED lighting solution is an important aesthetic decision, since lighting has a big impact on the look of your building, now and for years to come. It's also an important financial decision, since you need to find a right-sized solution that meets your specific needs and budget. And finally, consider the technical impact. Any lighting solution you choose needs to fit seamlessly into your building, and integrate smoothly with lighting controls and other key solution elements. With Vaya Free Form, the choice is simple.

Vaya Free Form

Dimmable White

Vaya Free Form is a flexible linear lighting solution for straight or curved coves and recessed applications. Free Form gives you even, uniform white light on any surface, in any environment. You can easily cut and connect interior Free Form, enabling illumination that conforms to unusual and difficult-to-light shapes while eliminating waste. In outdoor environments, you can cut and reseal Free Form, retaining its IP66 rating.

Vaya Free Form Dimmable White

For even, uniform, single-temperature white light

Vaya Free Form Dimmable White	
Lumens per 300 mm section	251 to 274
Power Consumption	42 W per 5 m (15 ft) 84 W per 10 m (30 ft)
Beam angle	120°

Let's take a closer look

Ultra-durable

The frosted 120° lens and opaque enclosure protect the LEDs and internal circuitry.

Choose your length

Up to 10 m (33 ft) of Free Form is supported in a single run. Power cables can be up to 8 m (26.3 ft), including the leader cable and all jumper connections.

Cut to fit

Choose the size of your segment so you're only using what you need.

Versatile control

Control Vaya Free Form using your 0-10 V, DALI, DMX, or DyNet device.

Make connections

Our simple leader cable connectors make it easy for you to clip segments together. Just push and click for gap-free illumination, even on tight corners.

Watertight

An overmolded integrated leader cable keeps your luminaire protected whatever the weather.

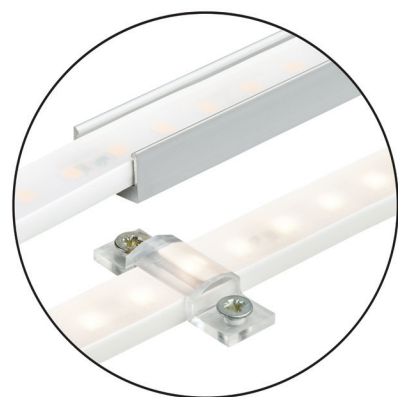

Accessories

Mount along curves or in straight runs using the mounting clips or mounting track.

Secure mounting

Mount Vaya Free Form along curves or in straight runs using durable mounting clips and tracks. Shifting is a thing of the past.

Set the ambience

Color temperature options are 3000 K or 4000 K.

Exceptional lighting takes more than a luminaire

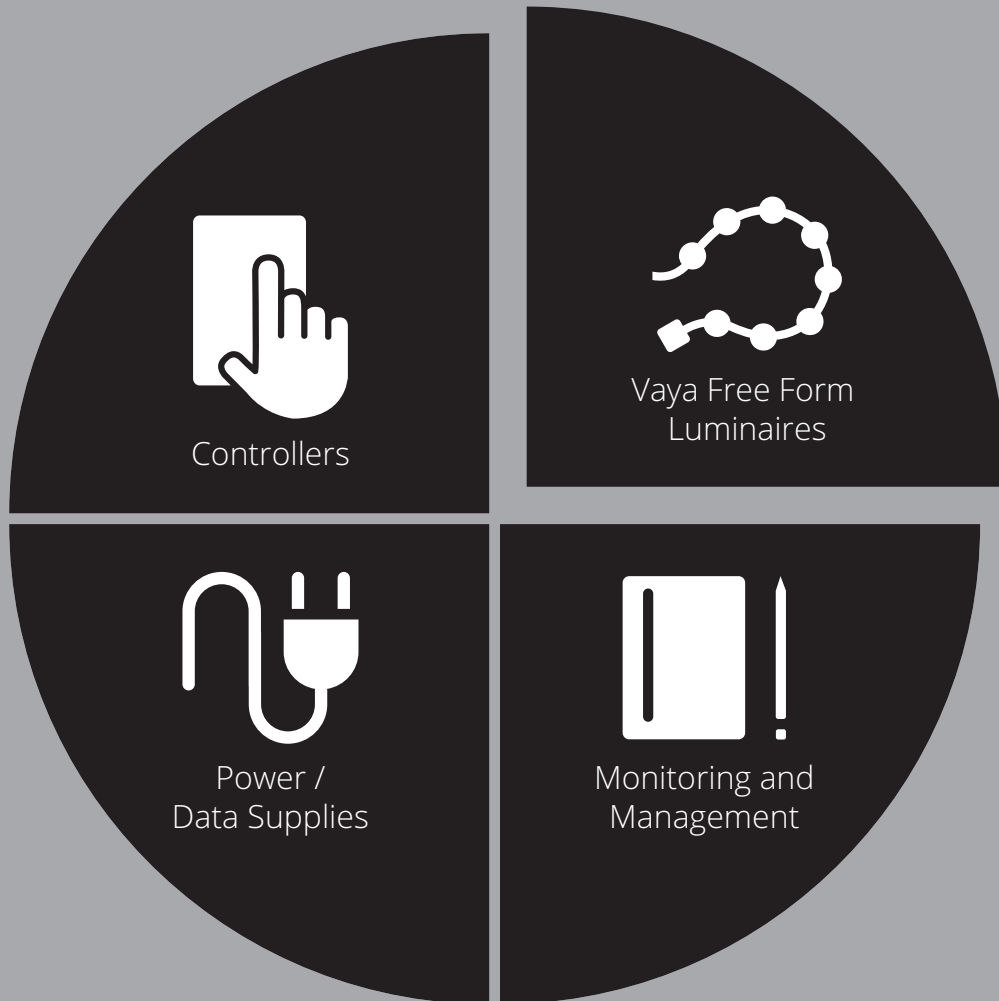

To unlock the full potential of your Vaya Free Form luminaires, you need the right components to power and control them. Color Kinetics Vaya Series completes your solution with:

Controllers

Our broad line of controllers brings you differing capabilities that match your specific needs, the complexity of your project, and your budget. Our controllers offer the industry-standard DMX protocol, or our proprietary, scalable KiNET protocol for Ethernet networks. Because of addressing

limitations, DMX is appropriate for relatively simple installations, or for light shows in which multiple Vaya Free Form luminaires operate in unison.

And Vaya Free Form can also be used with third-party controllers.

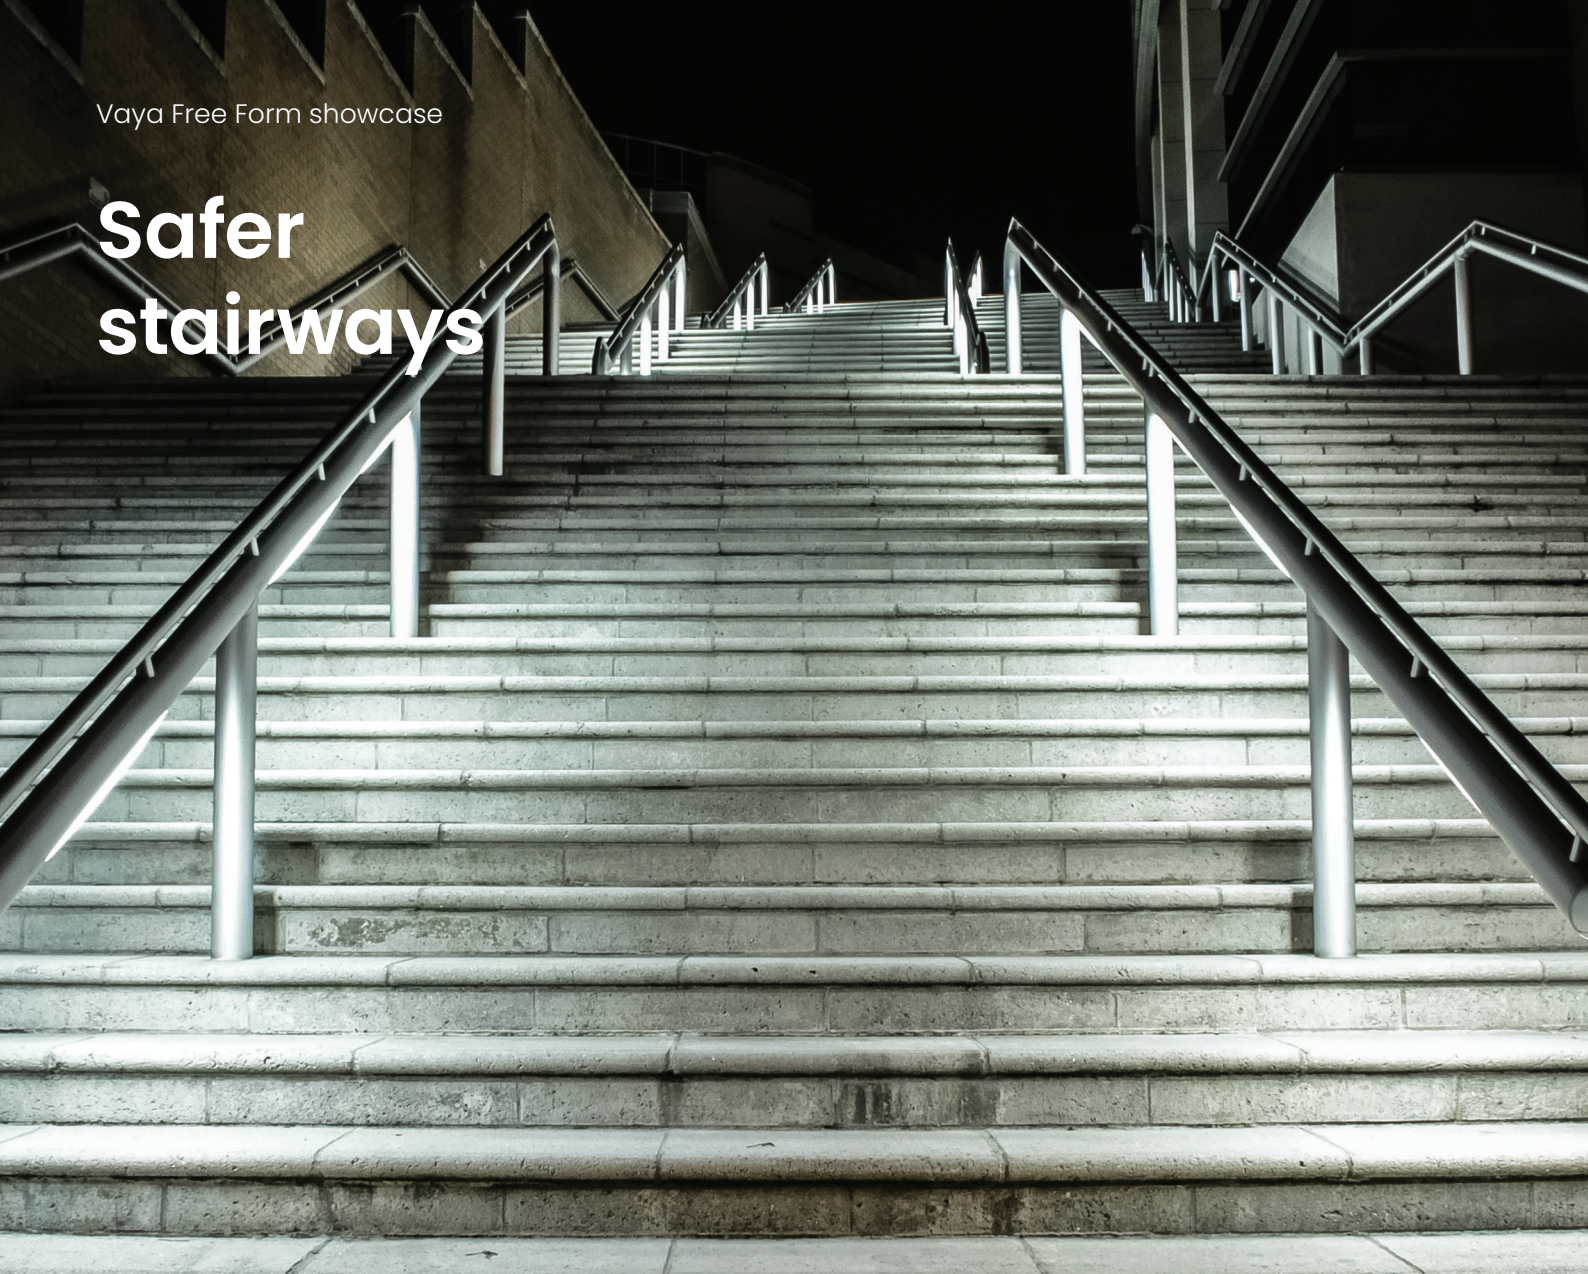

Power/Data Supplies

Vaya Free Form luminaires' standard On-Off or custom DMX-512 control allows for dimming and dynamic control with industry standard protocols, allowing for easy setup and third-party system integration.

Monitoring and Management

Interact Landmark (formerly Philips ActiveSite) is the first-ever cloud-hosted connected lighting system for architectural LED lighting installations. Interact Landmark allows you to remotely monitor, manage, and maintain an installation site from anywhere in the world, using a secure web connection.

Safer stairways

Illuminating steps for safety.

Vaya Free Form can be used on public stairways, illuminating the steps to ensure the safety of the people who use them. Luminaires are fitted discreetly under the handrail, creating a natural effect, and power supplies are concealed in a secure enclosure.

A halo of bright light

Photography: AWA/Sattva In-house Architecture Team

Installing flexible luminaires around intricate ceiling structures.

Curved coves are no match for Vaya Free Form. This mall is a perfect example of how the mounting clips can be used to bend the luminaires around intricate ceiling structures. The result? A crisp, bright and energized space.

A place to unwind

Photography: Robin Hill

Creating a relaxed
atmosphere.

A hotel bar and restaurant should help guests relax after a long day. By installing Vaya Free Form on the underside of a bar, in the coves, and in the ceiling, you can create a warm and ambient setting. Perfect for enjoying a drink and a bite to eat.
