RC660B LED44S/830 PSD W60L60 MO-PC W

ArcForm, LED Module, system flux 4400 lm, 830 warm white, Power supply unit with DALI interface, MESO optic in polycarbonate cover, Plug-in connector 3-pole Wieland/Adels compatible and 2-pole control signal for light regulation

More and more customers are looking for lighting solutions that support the architecture of the building and the types of activity taking place in certain zones. A luminaire with soft light and a gentle appearance is perfect for those places where additional quality of light adds value. With the cleanly designed ArcForm, the optical system using MesoOptics technology creates soft, comfortable lighting, with a full luminous surface. The luminaire's wide beam shape means that the light distribution is uniform throughout the entire space, rather than directional. And the LED boards and optics offer significant energy savings compared to a similar conventional solution.
