MAXOS LLT5, 54 W

The sturdy trapeze reflectors for TL5 are designed first for applications in supermarkets, shops and industry. They are made of steel, with a white or silver finish. The reflectors are made for electrical units holding one or two TL5 lamps 54, 49 or 80 W and provide an excellent light output ratio. There are basic trapeze reflectors without an additional mirror inlay and trapeze reflectors with dedicated aluminum mirror inlays. These are designed for narrow-beam or medium-beam light distributions, asymmetrical wall-washing light distribution on request. Moreover perforated reflectors giving a more airy design and slotted trapeze reflectors (without mirror inlays) can be ordered to create an indirect uplighting effect. For glare reduction, the trapeze reflector can be equipped with a white steel louver (L-T). The reflectors are fixed to the electrical units via a simple click-in. The reflectors can be connected to each other in a line with a connection piece at one end of the reflector coming with the reflector. End plates for the beginning and the end of the light line, are available as accessories.
