

Maxos TL-D, facet reflectors and optics

4MX093 1/2 36 P

MAXOS LLT8, 36 W

The design-orientated facettet reflectors for TL-D are ideal for applications focusing on trade (such as supermarkets and shops) and for offices. They are made of steel, with a white or silver finish, and are available for electrical units holding 1 or 2 TL-D lamps. The 2-lamp versions of the facettet reflectors must be used with special electrical units (lamp holder F32 mm). A facettet reflector comes without a pre-mounted mirror inlay and can be integrated with a semi-high-gloss (D6) OLC optic of high-quality aluminum. This optic has parabolic side reflectors and parabolic lamellae, and it can create either a medium beam (with an integrated white top reflector) or a narrow beam (with an integrated mirror top reflector). A prismatic acrylic screen to cover the facettet reflector is also available. For basic glare reduction, the facettet reflector can be equipped with a white-coated steel louver. The reflector is fixed on the electrical units via a simple click-in. The facettet reflectors must be connected to each other with additional coupling pieces. End plates for the beginning and end of the light line are available as accessories.

Product data

General Information	
Accessory color	-
Product family code	4MX093 [MAXOS LLT8]
Operating and Electrical	
Power Consumption	36 W

Approval and Application	
Ingress protection code	-
Product Data	
Order product name	4MX093 1/2 36 P
Full product name	4MX093 1/2 36 P
Full product code	403073259959200
Order code	910683034021

Maxos TL-D, facet reflectors and optics
