

Pacific LED Green Parking

WT470Z MDU-CS

Pacific LED Green Parking, Accessory

Lighting is needed in parking garages to provide safety and guidance. However, because it is not possible to predict exactly when light will be needed, the lighting is often left on. As a result, lighting energy costs can be as high as 70% of the total operational costs of a parking garage. Based on the newest LED technology and optics, Pacific LED Green Parking with presence-detection controls is an innovative, flexible and fully retrofit system for parking operators who want to reduce their energy consumption and the related CO₂ emissions – without compromising the safety and comfort that lighting offers parking garage users.
