## Maxos fusion Panel, 840 neutral white, Power supply unit with DALI interface, DC compatible, external, Opal, White

Maxos fusion is an adaptable LED trunking system that offers an excellent quality of light while more than halving energy costs compared to fluorescent lamps. For retail applications, a family of linear panels, non-linear modules and a spot portfolio can be smoothly integrated into the track backbone to let your merchandise sparkle and stand out. For industrial applications, the focus is on reducing installation and maintenance cost by using fewer linear panels. With the electrical set-up of up to 13 wires, the freedom to position these fixtures as required and the integration of other services/third-party hardware, the system allows you to reduce ceiling clutter. It can also be easily re-configured to accommodate future lay-out changes. The infrastructure is enabled to integrate sensors for data collection, giving you the opportunity to use insightful granular information to support your business.

## Product data

| General Information |  |
| :--- | :--- |
| Light source replaceable | No |
| Number of gear units | Yes |
| Driver included | *-Per Lighting Europe guidance paper |
| Remarks | "Evaluating performance of LED based |
|  | luminaires - January 2018": statistically |
|  | there is no relevant difference in lumen |
|  | maintenance between B50 and for |
|  | example B10. Therefore, the median useful |
|  | life (B50) value also represents the B10 |
|  | value. |
