

ArcTone MCS/ MRS532-533 C

ZZS551 C PG D89 PROTECTION GLASS

ArcTone is a range of projectors that create powerful lighting accents – ideal for retail applications such as fashion stores. They have a refined, compact form with curved edges. The combination of black and white or other finishes like chrome makes the projector look even smaller and offers maximum variety in fixture appearance. Thanks to ArcTone's 'mix & match' feature (you can combine the various options in finishing, colors, lamp types, optics and accessories), the projectors can be customized to the specific application. With a choice of the latest CDM lamps and gear, ArcTone enables you to create amazing light effects, while its compact, duo-color form ensures a perfect match with a host of interior styles
