BN086C LED10/WW L1000

LED Module 1000 lm, Warm white

Most customers want lighting solutions that balance the initial investment and operational energy savings. Until now, LED linear lighting solutions were often designed for direct replacement of T5 or T8 fixtures. This meant that there was a risk of excessive use of light and energy in non-functional lighting applications such as cove, shelf or decorative lighting. MAD Batten prevents redundant light in these applications, thereby greatly reducing energy consumption.
