

ActiLume 1-10V

LRI1655/00 ActiLume 1-10V Sensor 100 Cm

The ActiLume 1-10 V system consists of a sensor and a SwitchBox (controller) designed for easy integration into luminaires. The sensor can work independently of the SwitchBox. In combination with the SwitchBox, the luminaire will be switched off when enough daylight is present and/or when no presence is detected. The ActiLume 1-10 V luminaire-based sensor enables daylight regulation and dimming when no presence is detected. The delay time can be customized between 1 and 30 minutes.
