PDS-60 24V Pre-programmed

Power / data supply for indoor and outdoor applications

For device mounting and maintenance details, refer to the Installation Instructions included in the product packaging, or download documentation from www.colorkinetics.com/ls/pds/pds60/

PDS-60 24 V Pre-programmed is a versatile power / data supply designed for indoor and outdoor LED lighting installations using fixtures from Philips Color Kinetics.

In runs with multiple power / data supplies, PDS-60 24 V Pre-programmed functions as a master control unit, delivering data to the other power / data supplies in the run. Therefore, you use one PDS-60 24 V Pre-programmed unit per run, and standard PDS-60 24 V DMX / Ethernet units for all additional power / data supplies.

PDS-60 24 V delivers 62 watts of power output and accommodates input voltages ranging from 100 VAC to 240 VAC. Short-circuit protection prevents device failure due to incorrectly wired fixtures.

PDS-60 24 V Pre-programmed features built-in visual effects, allowing configurations without Ethernet or DMX controllers.

Featuring a NEMA 4 (IP66) enclosure, PDS-60 24 V Pre-programmed installs in dry, damp, and wet locations.

PDS-60 24 V Pre-programmed offers multiple standard-size conduit entries to accommodate 1/2 in (13 mm) and 3/4 in (19 mm) trade-sized conduit.
