- Energy saving
- Warm white light

### Special characteristics

- Vertical and horizontal wall mounting possible
- On/off switch on article

### Designed for your bathroom

- IP44, perfectly suited for your bathroom
- True skin color with high quality light

# Highlights

## Always a Philips bulb included

High quality Philips EcoLamp energy efficient light bulbs are included in the box to achieve the best light effect.

## Vertical and horizontal

This lamp can be installed vertically or horizontally, just the way you like it.

## True skin color

This Philips bathroom light makes colors reflect in a natural and accurate way. Just the way the sun would do.

## Energy saving

This Philips energy saving lamp conserves energy compared to traditional light sources, helping you to save money on your electricity bills and do your bit for the environment.

## On/off switch on article

With the button discreetly integrated onto the lamp, you can easily switch the light on and off.

## IP44 - bathroom safe

## Warm white light

Light can have different color temperatures, indicated in units called Kelvin (K). Lamps with a low Kelvin value produce a warm, more cosy light, while those with a higher Kelvin value produce a cool, more energising light. This Philips lamp offers warm white light for a cosy atmosphere.

This Philips bathroom light is especially designed for humid environments. It was tested rigorously to ensure its water resistance. The IP level is described by two figures: the first one refers to the protection level against dust, the second against water. This bathroom light is designed with IP44: it is protected against splashing water, this product is most common and ideal for bathroom use.

# Specifications
