DOOR DETAIL

LENS

### INSTALLATION PROCEDURES

1. Disengage (2) 1/4 turn door fasteners and carefully open and remove door from luminaire housing.
2. Drill out (5) pop rivets using #29 (.136 diameter) drill bit.
3. Remove hanger bracket, (2) 8-32 screws, and (2) locknuts.
4. Pry inner ring loose from gasket with flat blade screw driver, being careful not to damage gasket.
5. Push existing lens out of door frame. Gasket will come with it.
6. Carefully peel gasket off of lens.
7. Discard lens.
8. Install gasket onto replacement lens.
9. Install gasket and replacement lens into door frame, lining up holes in gasket with holes in frame.
10. Re-install inner ring, lining up holes in ring with holes in gasket.
11. Re-install hanger bracket with (2) 8-32 screws and (2) locknuts.
12. Fasten inner ring in place with (5) 6-32 x 1/2" long pan head screws and locknuts.
13. Re-install door in luminaire.
