Enter the order code into the appropriate box above. Note: Gardco reserves the right to refuse a configuration. Not all combinations and configurations are valid. Refer to notes below for exclusions and limitations. For questions or concerns, please consult the factory.

1. Refers to relative strength based on wind load factors. $\quad L=$ Light $\quad M=$ Medium $\quad H=$ Heavy

Dimensions

NOTE: Factory supplied template must be used when setting anchor bolts.
Gardco will not honor any claim for incorrect anchorage placement from failure to use factory supplied templates.

| RA5-CB-20M | 20' | 0.156 | 3.1 | 4 | 5.5 | 7.5-9.5 | $3 / 4 \times 17 \times 3$ | 3.25" |
| RA5-CB-20H | 20' | 0.188 | 4.2 | 5.6 | 7.5 | 7.5-9.5 | $3 / 4 \times 17 \times 3$ | 3.25" |

2. Warning: Additional wind loading, in terms of EPA, from banners, cameras, floodlights and other accessories attached to the pole, must be added to the luminaire(s) EPA before selecting the pole with the appropriate wind load capability
3. Factory supplied template must be used when setting anchor bolts. Gardco will not honor any claim for incorrect anchorage placement resulting from failure to use factory supplied templates.

## Poles 5" Straight Round Aluminum - Cast Base

## Specifications

All aluminum alloys shall comply with metallurgical and mechanical properties set forth in the Aluminum Association Standards.

POLE SHAFT
The shaft shall be extruded from all new seamless 6063 alloy aluminum and shall be heat treated to produce a T6 temper. The shaft shall be polished with fine grain aluminum oxide cloths, resulting in a high quality circumferential satin brushed finish. After finishing, each pole shall be fully tire-wrapped with neutral PH krinkle/kraft paper for protection in shipment.

## General Pole Information

## DESIGN

The poles as charted are designed to withstand dead loads and predicted dynamic loads developed by variable wind speeds with an additional $30 \%$ gust factor under the following conditions The charted weights include luminaire(s) and/or mounting bracket(s)
The wind velocities are based on 10 mph increments from 80 mph through 100 mph . Poles to be located in areas of known abnormal conditions may require special consideration. For example: coastal areas, airports and areas of special winds.

## ANCHOR BASE

The anchor base is cast from A356 alloy aluminum. The shaft shall be inserted into the anchor base casting. The anchor base casting and shaft shall be joined by a continuous circumferential weld at the inside bottom of the anchor base. The completed assembly shall be heat treated to a T6 condition. A full base cover shall be included with each anchor base.

ANCHOR BOLTS
Anchor bolts are fabricated from a commercial quality hot rolled carbon steel bar that
meets or exceeds a minimum guaranteed yield strength of 50,000 psi. Bolts have an "L" bend on one end and threaded on the opposite end. Anchor bolts are completely hot dipped galvanized. Four (4) properly sized bolts, each furnished with two (2) regular hex nuts and two (2) flat washers, are provided per pole, unless otherwise specified.

HAND HOLE
All poles shall include a peripherally reinforced flush covered hand hole centered $18^{\prime \prime}$ above the bottom of the pole. The opening shal measure 3 " $\times 5$ ".
responsible for proper selection of pole, luminaire, accessory and foundation under the given site conditions and intended usage. The addition of any items to the pole, in addition to the luminaire, will dramatically impact the EPA load on that pole. It is strongly recommended that a qualified professional be consulted to analyze the loads given the user's specific needs to ensure proper selection of the pole, luminaire, accessories, and foundation. Gardco assumes no responsibility for such proper analysis or product selections. Failure to insure proper site analysis, pole selection, loads and installation can result in

## POLE TOP CAP

Each pole assembly is provided with a removable composite friction-fit pole top cap.

## FINISH

Poles are available with bronze, natural or black Aluminum Association Architectural Class 1 anodized finish. Electrostatically applied, thermally cured TGIC polyester powdercoat finish or liquid polyurethane is also available
pole failure, leading to serious injury or property damage.

GENERAL INFORMATION
Mounting height is the vertical distance from the base of the lighting pole to the center of the luminaire arm at the point of luminaire attachment.Twin arms as charted are oriented at $180^{\circ}$ with respect to each other. For applications of two (2) arms at $90^{\circ}$ or other multiple arm applications, consult the factory.

## WARRANTY

Gardco poles feature a 1 year limited warranty. See Warranty Information on www.sitelighting. com for complete details and exclusions

## Poles 5" Straight Round Aluminum - Cast Base

## Orientation Information

Factory installed options and accessories

Orientation is measured clockwise from the Hand Hole Center.

For Factory Installed Options and Accessories, Specify Orientation from Hand Hole and Height Above Pole Base Where Required.

Standard arm mount luminaire orientation

D2@90 Drilled for 2 Luminaires at $90^{\circ}$

D3 Drilled for 3 Luminaires @ $90^{\circ}$
