LIGHTOLIER**

Downlighting

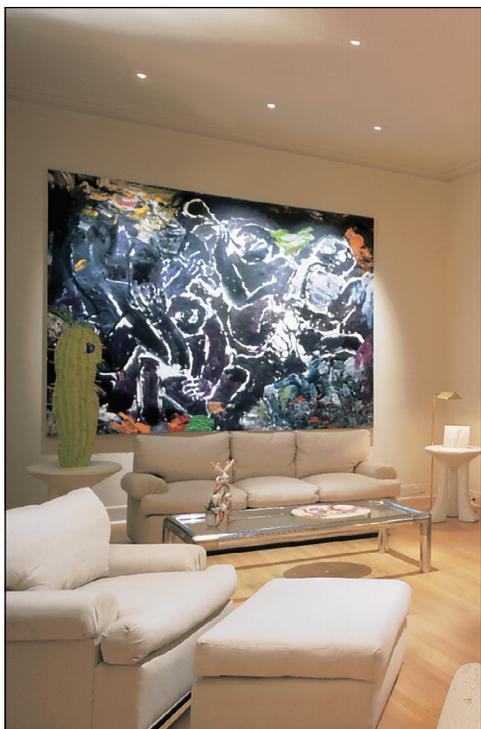

LyteCaster Lytening

Increase the **beauty** and **value** of your home

Philips Lightolier LyteCaster Lytening IC/Non-IC frame-in kits are designed for convenience. Our remodelers are dual-rated for both insulated and non-insulated ceilings, so there is no guess work involved.

One of the most overlooked aspects of a remodel is the lighting. Done well, it will enhance the beauty of the space, increase the value of the home, and provide a more useful and productive environment. The task is to achieve that look without looking like you remodeled. Lytening, a leader in residential lighting, offers a recessed downlight for existing ceilings that is easy to install and provides an exceptional finished look.

LyteCaster Lytensing frame-in kits

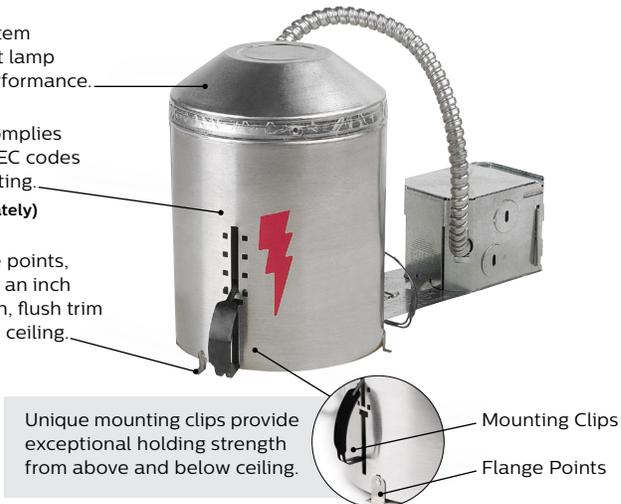

A unique mounting design provides pressure above the ceiling, up to 2" thick, while three unobtrusive feet, 20/1000th of an inch thick, hold from below the ceiling. The result, a superior finished look that holds tight against the ceiling eliminating sagging and light leaks while providing a clean, finished look.

Unitized optic system ensures consistent lamp alignment and performance.

AirSeal ready – complies with WSEC and MEC codes with proper gasketing.

(LAS56R sold separately)

Three small flange points, only 20/1000th of an inch thick, make a clean, flush trim appearance at the ceiling.

Unique mounting clips provide exceptional holding strength from above and below ceiling.
