Highlights

Three light settings
Light can have different color temperatures, indicated in units called Kelvin (K). Bulbs with a low Kelvin value produce a warm, cozy light, while those with a higher Kelvin value produce a more energizing light. These new Scene Switch bulbs allow you to switch from functional lighting to natural light and to a cozy, warm dimmed light. Light levels can changes from 100% to 40% to 10%. Now you can easily customize your room for a variety of tasks or adapt it to suit your mood.

Gentle LEDs, easy on the eyes

It's easy to see how harsh lighting can strain the eyes. Too bright, and you get the glare. Too soft and you experience flicker. Now you can gently light up your world with LEDs designed to go easy on the eyes, and create the perfect ambience for your home.

Plug and play

Does not require any additional installation or a dimmer switch. This bulb is not suitable for use with dimmers. If used on a dimmer set the dimmer setting to 100% brightness.

Instant on
