- Make it look like you're home with smart lights
- Control lights with your voice
- Control lights with one click
- Flexible, wireless mounting

# Highlights

## Control lights away from home

The Philips Hue app gives you complete control over your lights, even if you're not at home. Switch your lights off and on remotely using just the app to ensure your home is always lit the way you want it.

## Come home with light

Set your Philips Hue app to recognise when you're almost home. Before you even step out of your car or walk up the path, your selected smart lights turn on automatically.

## Make it look like you're home

Use the Philips Hue app to schedule light routines whenever you're away. Your smart lights will turn on at the times you've selected, and sometimes a few minutes before or after, to truly mimic your presence in the house.

## Control with your voice

When connected to the Hue Bridge, you can pair your lights with Alexa, Apple HomeKit, and the Google Assistant and control your lights using just your voice. Simple voice commands let you turn your lights on and off, dim or brighten your lights, and even set a light scene.

## Control lights with one click

A single click controls your smart lights —no smartphone needed. Use one press to turn your lights on and off or press and hold the button to dim and brighten them. Already set up to do exactly what you need, the Philips Hue Smart button is ready to use wherever you need it.

## Flexible, wireless mounting

With wireless technology, the Philips Hue Smart button installs in seconds anywhere in your home. Replace an existing light switch with the included mounting plate or use the mini-mount to place it on any surface. If you'd rather keep it portable, no problem: the Smart button is magnetic, so you can place it on any magnetic surface, such as the fridge.
