Comfort you can see

Philips LED outdoor luminaires featuring comfort optics

Goodbye, **glare**

Enjoy high-performing, energy-saving LED technology without worrying about the harsh glare or pixelization that can occur with LED luminaires.

Outdoor LED luminaires can create unwanted harsh glare that presents a bad impression on pedestrians, making it a challenge to save energy and keep a welcoming outdoor environment. Our portfolio of luminaires with comfort optics provide reduced glare for an enhanced user experience. Now you can save energy and provide comfortable lighting solutions with Philips outdoor luminaires featuring comfort optics.

Uniformly lit luminous opening is easier on the eyes than pixelated LED solutions.

Our comfort optics were designed to minimize light in the glare zone – between 60° and 80°.

No compromise

We have engineered our comfort optics with the perfect balance of performance and visual comfort – so you don't have to sacrifice one for the other. With our comfort optic solutions not only will you get high quality light that is comfortable to view, you also get excellent uniformity.

Enjoy comfort in any style
