

New generation of U-shaped energy-saving lamps delivers better value for money

Genie Plus

This U-shaped energy-saving lamp is designed as a more affordable, longer-lasting replacement for incandescent lamps. The product family includes lamps ranging from 8 to 23 W, allowing easy replacement of most GLS lamps from 30 to 100 W.

Benefits

- Saves over 80% energy compared with incandescent lamps with a similar light output
- Average lifetime up to 8 times longer than that of incandescent lamps, reducing the need for lamp replacement

Features

- U-shaped energy-saving lamp with long lifetime of up to 8 000 hours
- Better light distribution than the previous generation of 'stick' CFL-I lamps
- Low mercury content to protect the environment

Application

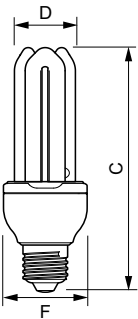

- Widely used to replace incandescent lamps in all kinds of general lighting applications
- Not suitable for dimming or for electronic devices

Versions

23W E27
