

Brings out the true, vibrant colors in your home

Natural Reflector Flood

Try changing your current light bulbs to Philips Natural Light! Natural Light's distinctive blue coating reduces dull light effects to provide light that is more vibrant and natural. The wrong lighting can make anyone appear older. The right lighting can make skin tones and color look natural and healthy. Natural light reflector bulbs are available in the familiar R20 and BR 30 shapes. These reflectors give off a wide beam of light making them ideal for track and recessed fixtures. Philips Natural Light bulbs can help you to see things as they should be. Their light is more like natural daylight.

Benefits

- Provides remarkable light that is vibrant and natural, similar to natural daylight.
