

Incandescent Infrared Reflector Flood

Reflector Infrared BR40,PAR38

Philips Family of Specialty Incandescents provide the perfect light for dramatic accents and display lighting as well as general lighting in a variety of applications. Philips Infrared lamps are suited for heating and drying in industrial and commercial applications. These incandescent, gas-filled infrared heat lamps come up to full temperature almost immediately, eliminating costly warm-up time. Highly efficient heat generators that produce a minimum of light rays and a high amount of infrared radiation. The BR40 lamp provides a built-in reflector for radiant energy control.

优点

- No warm-up time required.
- Decreased heat loss.

特点

- Instantaneous heat
- Radiated heat only warms object to be heated
- Build-in reflector for radiant energy control

应用

- Ideal for bathroom recessed fixtures and commercial and industrial applications.
