

TBS707 Wing-C

TBS707

The Wing-C range of recessed luminaires revolutionize workspaces by offering a choice of direct/indirect light, which perform with excellent efficiency while creating elegance and sophistication that designers have been looking for. Apart from adding excitement to the workspace with its unconventional styling, it enhances peoples' comfort by providing glare free light. It blends the direct/indirect lighting experience with an even light distribution while offering the option of glare-free highlights or a softer, diffused, shadow-less light. Easy to install and seamlessly integrated into the ceiling, these luminaires add a touch of class to your office environment as well as to hotel lobbies, restaurants and retail outlets.

Features

- Stylish and functional: ergonomically designed for the modern, high tech office environment. It is designed with wide, decorative and polycarbonate finish coupled with a robust construction. Such aesthetics offer elegance while easing cleaning and maintenance
- Ease of installation: special aluminium extrusions ensure reliable and error-free mounting of optics
- Elegant and comfortable solution: a choice to create a more comfortable environment with its high efficiency, low-glare and 3D OLC optics. An indirect lighting option is also available to create a soothing and shadow-less ambiance

Application

- Open-plan offices
- Cell-offices
- Call centres
- Reception areas
- Corridors
- Retail outlets
