

# ProLux – saving without impact

## ProLux TPS550 C

In industry, the bottom line is affected by a whole host of factors – worker productivity, running costs and maintenance, to name just a few. In today's economic environment, with margins under pressure, all businesses operating high-bay facilities are faced with the pressing need to save energy. Our ProLux high-bay solution is a direct replacement for current HID high-bay systems and enables significant energy savings. The combination of robust housing, high-reflectance material and specially designed reflector add up to a high-efficiency luminaire that can help drive profitability by improving energy efficiency.

### Benefits

- Maximum energy saving
- Easy maintenance
- Flexibility in design and installation

### Features

- Saves 45% energy compared with HID
- High-output lamps and optics
- Uniform light levels for visual comfort
- Choice of three beams
- Pipe/surface/suspended versions
- Responsive system – on/off with no run-up times
- Integrated system – all Philips components
- Easy to maintain

### Application

- Warehouses and distribution centers
- Light industry and assembly halls
