Actinic BL PL-L Secura - compact and HACCP-approved

Actinic BL PL-L Secura

With an optimized spectrum matching the eye sensitivity of the housefly, Actinic BL PL-L Secura lamps are perfect for attracting insects. With the compact PL-L product format in a variety of wattages, new attactive designs are possible. Furthermore, these lamps have virtually no UV-B output, and so are perfectly safe. In addition, they have a special "Secura" sleeve that keeps all glass and components together in the case of accidental breakage. This eliminates the risk of glass splinters showering down on food preparation areas, for example. And that is why it meets the strict HACCP requirements. What's more, with the lowest mercury content in the industry and being 100% lead-free, these lamps represent a very good environmental choice.
