

The ultimate in user interface solutions – balancing aesthetics and function

Dynalite User Interface

Regardless of the level of integration and range of available functions, a control system requires an intuitive end-user interface, so that users can easily schedule and activate the various control functionalities. Philips Dynalite user interfaces come in a broad range of panels, touchscreens and wiring devices – with a rich variety of styles and finishes to match any project budget, level of interactivity, or décor requirements.

Benefits

- User interfaces for automation systems from standard up to premium
- Fully customizable in terms of functions and aesthetics
- Flexibly programmable during and after commissioning

Dynalite User Interface

PABPA-MA-X

A new evolution in UI. End-users are increasingly demanding a modern cost-effective interface for home automation and guest-room management systems. The interface is expected to focus on usability rather than technical functionality, while still incorporating a broad range of control features. With Antumbra Touch, Philips is introducing a new approach to UI design, with the emphasis on simplicity, modern design trends, aesthetics and a user-friendly look & feel. Situated at the cutting edge of modern designs, Antumbra Touch is a cost-effective user interface panel that successfully consolidates the best heritage of Philips Dynalite UI's – functionality, programming flexibility, and customization.
