

Original Replacement Modules for best quality and performance

Projection module front Optoma

Using original Philips manufactured replacement modules, all with patented high quality Philips UHP lamp inside, is the best lamp replacement solution for your projector. Philips replacement modules protect customers from any counterfeit modules. Philips replacement modules ensure the quality of projection experience in terms of safety, light output, reliability and efficiency. The portfolio of projector replacement modules covers the majority of projector brands.

Benefits

- Identical lamp as used in the original projector for great viewing experience
- Low cost of ownership due to long lamp lifetime
- Easy to replace by end-users
- The original lamp offers perfect picture quality with deep and rich colors

Features

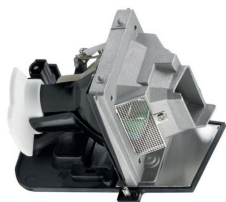

- Seamless fit - identical lamp used as in the projector
- Match - the lamp in the module matches the projector specifications
- Authentic - a Certificate Of Authenticity guarantees the module is originally from Philips
- Robust - the complete module meets the highest quality standards
- Technology - the replacement module and lamp are designed with the latest Philips technology

Projection module front Optoma
