

Product Description

Capacitors for HID lamp circuits

Compensating capacitors are AC capacitors designed for individual correction of the power factor of transformers and magnetic ballasts in discharge lamps (e.g. fluorescent lamps, halogen and metal halide lamps, high-pressure mercury lamps, sodium lamps) in mains with a frequency of 50 or 60Hz. This allows for an improvement of the luminary's power factor to $\cos\mu > 0.85$

Benefits

- Up to 250v 50Hz/60Hz -40°C~85°C application
- Up to 250v 50Hz/60Hz -40°C~85°C application

Features

- Polypropylene film
- Polypropylene film
- Type A capacitor
- Type A capacitor

Application

- With magnetic ballasts for HID fluorescent and halogen lamps in lighting applications (road lighting, urban lighting, industry lighting, retail lighting, etc)
- With magnetic ballasts for HID fluorescent and halogen lamps in lighting applications (road lighting, urban lighting, industry lighting, retail lighting, etc)
- Capacitor should be restricted to built-in situations where relative humid is limited
- Capacitor should be restricted to built-in situations where relative humid is limited

Capacitors for HID lamp circuits

Versions

GPPR CALHID

Dimensional drawing

Product	E1	A1	A2	A3
