

A LED breakthrough in comfortable white light

Fortimo LED linear light module

The Fortimo LED linear light module (LLM) system represents a breakthrough in energy-efficient LED lighting for urban and residential applications. Cutting-edge LED technology ensures peak performance, delivering energy savings with Constant Light Output without compromising on light quality and comfort. Fortimo LED LLM offers a diffused white light LED alternative to traditional frosted light sources such as (compact) fluorescent, high-pressure mercury (HPL) and high-pressure sodium (SON) lamps. Designed primarily for residential outdoor lighting applications, this reliable, upgradeable solution is also suitable for many professional indoor applications. Fortimo LED LLM is a Green Product, contains no mercury and is fully RoHS-compliant.

Advantages

- Significant energy savings
- High-quality, comfortable white light
- Suitable for dimming and telemanagement systems

Fonctions

- Breakthrough system efficiency
- Future-proof Fortimo platform
- Easy to install, replace and upgrade
- Choice of two color temperatures; excellent color rendering and consistency
- Comfortable, glare-free light

Application

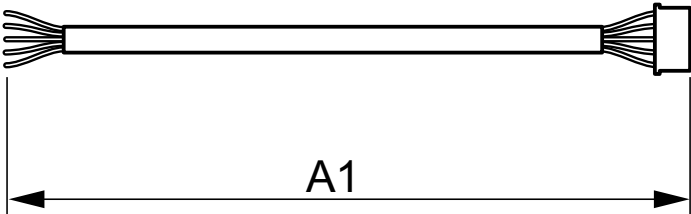

- Outdoor residential and solar (off-grid) applications
- Urban street lighting
- Cold-storage distribution centers
