

eW Flex Compact – Flexible strands of large high-intensity LED nodes with solid white light

eW Flex Compact

eW Flex Compact is a versatile strand of large, individually controllable white-light LED nodes. The flexible form factor allows dynamic points of white light to be installed across almost any interior or exterior surface, including walls, ceilings, floors, and three-dimensional sculptures. eW Flex Compact can also be used to light tight alcove spaces and signage.

Benefits

- Flexible strands fit almost any architecture
- Unrivalled flexibility to customize node count and spacing
- Bright white light in smallest available node

eW Flex Compact

Features

- Daylight-visible – each node produces a full-color light output of up to 24.8 candelas and 45,000 nits (per node)
- Multiple lens options – standard clear flat and translucent dome lenses; optional semi-frosted flat and semi-frosted dome lenses
- Adaptable mounting – strands can be mounted directly onto a surface. Optional mounting tracks ensure straight linear runs. Snap-on spacers hide cabling and mounting hardware between nodes to create a clean, finished look. Single-node mounts provide anchor points for installations with uneven node spacing or complex geometries.
- Outdoor-rated – fully sealed for maximum fixture life and IP66-rated for outdoor applications

Application

- Direct-view effect lighting
- Outdoor cove and accent lighting
