

eW Flex Micro – Flexible strands of small high-intensity LED nodes with solid white light

eW Flex Micro

eW Flex Micro is a versatile strand of small, individually controllable white- light LED nodes. The flexible form factor allows dynamic points of white light to be installed across almost any interior or exterior surface, including walls, ceilings, floors, and three-dimensional sculptures. eW Flex Micro can also be used to light tight alcove spaces and signage.

Benefits

- Flexible strands fit almost any architecture
- · Unrivalled flexibility to customize node count and spacing
- · Bright white light in smallest available node

eW Flex Micro

Features

- Daylight-visible each node produces a full-color light output of up to 2.3 candelas and 17,000 nits
- Multiple lens options standard clear dome and translucent dome lenses; optional clear and translucent flat lenses
- Adaptable mounting strands can be mounted directly onto a surface. Optional
 mounting tracks ensure straight linear runs. Snap-on spacers hide cabling and
 mounting hardware between nodes to create a clean, finished look. Single-node
 mounts provide anchor points for installations with uneven node spacing or
 complex geometries.
- Outdoor-rated fully sealed for maximum fixture life and IP66-rated for outdoor applications

Application

- · Direct-view effect lighting
- · Outdoor cove and accent lighting
