PHILIPS

Lighting

Creating and controlling light shows and effects is simple with this wide range of DMX and Ethernet controllers.

LED Lighting Systems Controllers

Intelligent LED lighting fixtures — including our IntelliHue, IntelliColour, IntelliWhite, and Precision Dimming products — require a controller that sends control data to the fixtures using standard lighting communications protocols such as DMX and Ethernet. Philips Colour Kinetics offers a complete range of DMX and Ethernet controllers, from simple wall-mounted, pushbutton keypads to highly sophisticated authoring and playback systems that can individually control tens of thousands of LED lighting fixtures for creating complex, dynamic effects and intricate light shows.

Benefits

• Configuration, programming, power, and control

Features
