

BRM822/826 - excellent performance, superior durability

Dome Top Louver School Bollard BRM822/826

In the schoolyard, bollards become objects for climbing on, hanging from, crashing into. Add the weathering effects of the elements and irregular maintenance and it's easy to see why there may be no more punishing environment for low level lighting. Gardco School Bollards are specifically designed and field-tested to meet the most extreme challenges kids can dish out.

Benefits

- Uniform illumination
- Superior spacings
- Solid vandal resistance
- Ensures lasting durability and reliability

Features

- Low brightness optical system
- High-strength steel tenon throughout length of luminaire
- Rugged extruded and cast aluminum construction
- Silicone gasketing

Application

- Landscape
- Walkways
- Parks and Plazas
