

FAWS, the switch allows you to adjust the luminaires wattage and light output in the field using ten preset positions.

FAWS

Optional Field Adjustable Wattage Selector (FAWS) switch can be operated even while wearing Lineman's gloves, providing tactile, audible and visual switch position markers.

Benefits

- Helps keeping a lower luminaire variety in inventory by being able to adjust luminaire to desired wattage at the onsite installation
- Provide flexibility for onsite last second adjustment vs photometry
- Include an auxiliary position option for future control system retro-fit

Features

- Provide 9 wattages options with 1 luminaire sku
- Fast installation process
- Cost effective solution

FAWS

Application

- Road and Street
- Parks and Plazas
