

LED performance that is squarely on the mark

Form Ten Square Area LED

In 1969, Gardco Lighting changed outdoor area illumination forever when it introduced the first full cutoff luminaire - the Form Ten Square. Today, the shape that started it all redefines itself for a new generation by incorporating state-of-the-art, high performance LEDs. Available in the 14" pole and wall mounted configurations, the Gardco extruded (EH) and formed (H) LED luminaires retain the features and benefits that made them industry leaders in site lighting. Visually appealing half cube proportions, toolless access to the optics and driver assembly, memory retentive silicone gasketing and rotatable optics are but a few of the qualities that helped define the industry leader.

Benefits

- Traditional styling with benefits of LED energy savings
- Provides up to 50% energy savings over HID
- Maintains uniform illumination for improved visibility

Features

- Two distinct housing sizes available in 14" and 19"
- LED retrofit kits available for existing Form 10 installations
- Toolless access to driver compartment and optical chamber

Application

- Security Lighting
- Area Lighting
- Site Lighting
