

Leonis – providing modern style and excellent performance

Leonis Arm Mount LED (LEN-LED)

Created with beauty, sustainability and durability in mind Leonis will contribute to the beautification of its surroundings. Leonis is not only a technological marvel, it is a work of art that will stand and withstand the test of time. Thanks to a forward thinking design team, the polyvalent Leonis can be fitted with either LED or HID lighting technologies. And if you opt for the latter, a LifeLED module can be retrofitted into your existing Leonis and easily replace your HID optics when you are ready to take advantage of our award-winning LED engine. The sturdy and high-quality materials chosen when manufacturing Leonis make it a durable and dependable luminaire. Because it is made in aluminum, the luminaire is 94% recyclable when it reaches the end of its life.

Benefits

- Reduced energy and maintenance costs
- Reduced light pollution
- Operational life of more than 70,000 hours
- Highly optimized light distribution performance
- Increased design life

Features

- Modular design
- Built with high-quality materials
- Designed using pure lines and dynamic shapes
- Advanced aluminum heat sink

Application

- Bridges, Monuments, Facades
- Road and Street
