

Low Voltage Connector – enabling easier installation

Low Voltage Connector

The LVC3Connector is a low voltage quick connector with positive lock screw design. Features include heavier prongs for a more positive connection with base ensures proper fit for single circuit. The LVC4 Connector is a low voltage “T” connector for branching off existing low voltage cable for additional runs. The MA22 is a silicone-filled wire connector necessary to protect splicings from moisture and oxidation for up to 10 gauge wire.

Benefits

- Quick and easy installation

Features

- Various options available

Application

- Landscape
