

Unparalleled design

Lytespan-to-Prospec Adapter

Adapter Housing: High-temperature impact resistant thermoplastic. **Basic Lytespan Track Strip:** Die cast aluminum, with high-temperature impact resistant thermoplastic insulator, supporting electrical contacts. **Accepts Lytespan luminaires.** **Track Attachment Fitting:** High-temperature impact resistant polycarbonate, rotates into track. **Adapter module can be flipped 180° to access one or the other circuit.** **Clamping Knob:** Rotation of clamping knob secures steel clamping toggle to track. **Attachment Lever:** Impact resistant polycarbonate. For mechanical/electrical connection to track.

Benefits

- Great for retrofit applications

Features

- Allows most Lytespan fixtures to be mounted onto ProSpec track

Application

- Fashion
- Food and Large Retailers
