

PureForm - pure in form and function, defining performance

PureForm P21 - Wildlife Friendly

We offer a range of site and area lighting solutions that are approved for use in areas within close proximity to sea turtle habitats. Incorporating amber LEDs in our luminaires ensures that light pollution will not interfere with sea turtles nesting and hatching patterns. The amber light source produces a narrower spectrum by omitting blue light that the sea turtles would otherwise confuse as moonlight. Each fixture will also include a specially designed shield to ensure that light is directed only to the target area. For more information on our standard PureForm P21 luminaire, please visit the [~LT~a href="http://www.usa.lighting.philips.com/products/product-highlights/pureform"](http://www.usa.lighting.philips.com/products/product-highlights/pureform) target="_blank"~GT~LT~b~GT~PureForm product page.~LT~/b~GT~LT~/a~GT~

Benefits

- Wildlife friendly
- Excellent backlight and glare control
- Ensures lasting performance in harsh conditions
- Maximizes pole spacing

Features

- Narrow range wavelength solution
- Innovative optic design
- Optimal thermal management
- IP66 rated
- 3G vibration rating

Application

- Parks and Plazas
- Road and Street
